

Gain an aerial view of dynamic situations

...with overwatch on every call

Put the advantages of tactical overwatch in every patrol car. Skydio is easy to operate, hard to crash, and can fly anywhere. Secure a perimeter, share real-time intelligence, and protect community safety while avoiding cognitive overload for the first responder.

LAW ENFORCEMENT AGENCIES
RELY ON SKYDIO IN

**47 STATES AND
ACROSS CANADA**

Locate persons of interest faster, day or night, with far less risk to officer safety

Improve tactics with a common operating picture shared between command staff and field team

Trust a solution designed, assembled, and supported in the U.S. to serve you now and into the future

It's easy with Skydio

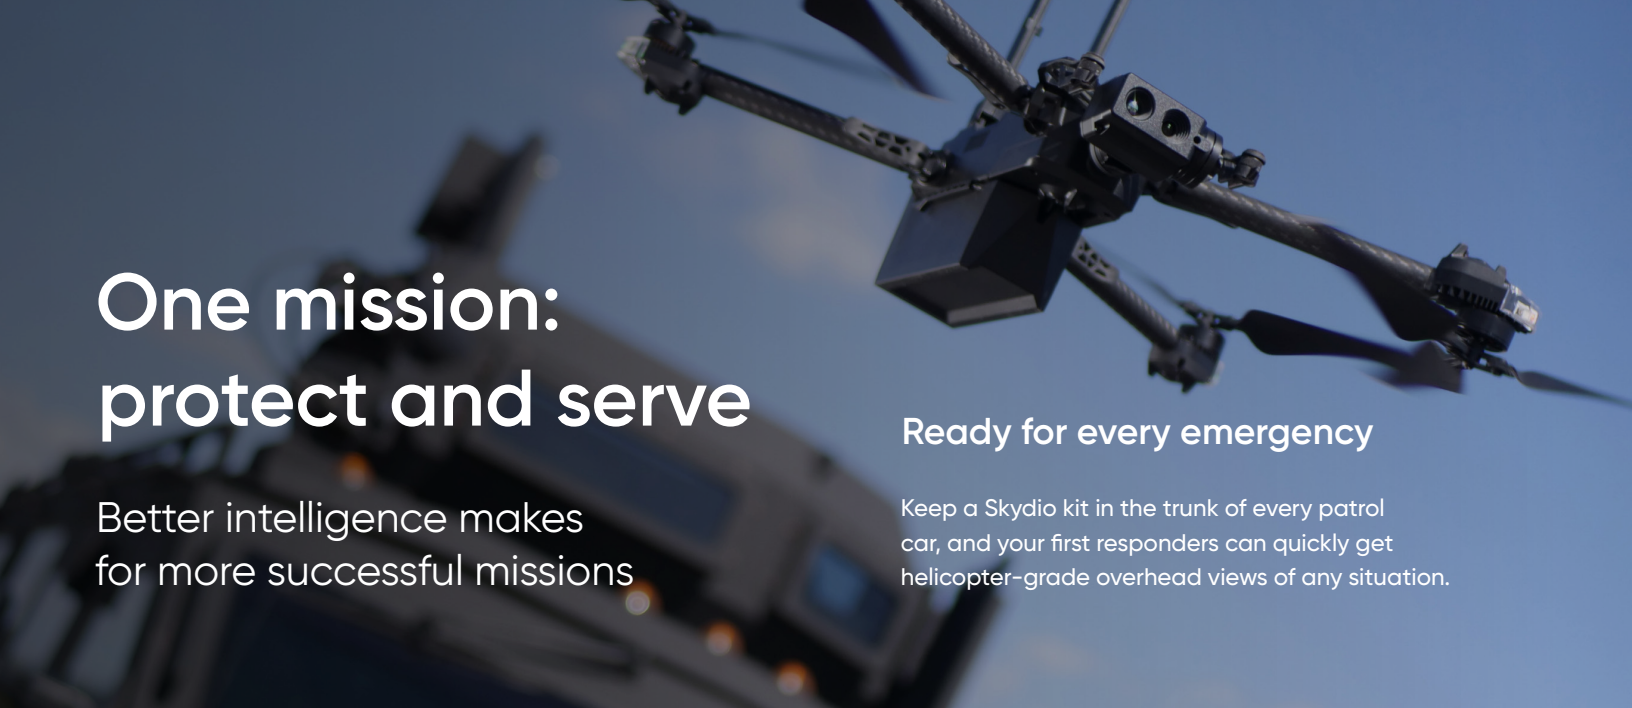

Train any officer to be a capable drone operator in just a few hours.

Confidently navigate in urban environments without fear of crashing.

Go from box to flight in 90 seconds to get the intel you need.

One mission: protect and serve

Better intelligence makes
for more successful missions

Ready for every emergency

Keep a Skydio kit in the trunk of every patrol car, and your first responders can quickly get helicopter-grade overhead views of any situation.

Nothing flies like a Skydio

At Skydio autonomy is an architecture, not an add-on feature. Our AI software and six cameras work together seamlessly. The result is a system that performs deftly in the most obstacle-rich environments with the least demand on the drone operator. A drone strategy that starts with Skydio delivers far greater value than any traditional drone ever can.

Fly beyond GPS bounds

Go wherever you need to go, indoors or out. No need to stay within satellite range.

Empower anyone to fly

Enable every officer to conduct overwatch with just a half day of training.

Go closer...quietly

Operate with stealth even at low altitudes, with propellers that barely make a sound.

Avoid crashes easily

Fly confidently and keep communities safe with advanced obstacle avoidance.

Stream quality intelligence

Share your live drone feed team-wide to gain a common operating picture.

"The emphasis is on having the drone in the patrol car, with the officer, ready to fly. Skydio makes it easy. It allows the officer to focus more on the mission."

SGT. DAX LAPORTE

Oklahoma City Police Department

Instant overwatch. For every call.

Get an aerial-view advantage without the distractions

Count on AI-driven obstacle avoidance to manage the flying so the first responder can focus their attention on the situation unfolding around them.

Stream real-time video to improve tactical coordination

Gain a common operating picture through a live feed to make better, faster decisions. Stream securely via Skydio Cloud, Axon Air, and other services.

Pack portability with performance

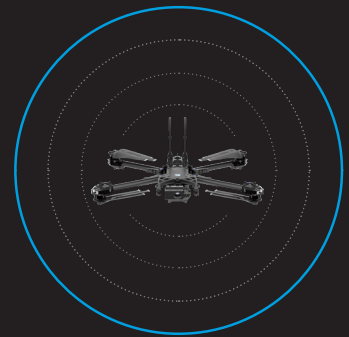

Get the job done in the most demanding settings. Skydio's foldable, durable design makes overwatch accessible anywhere, in any conditions.

Spot persons of interest day or night

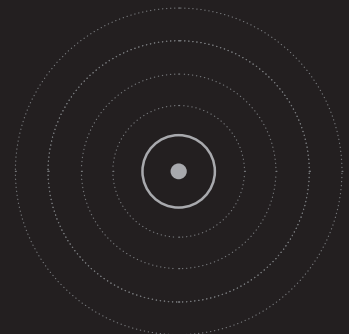

Your Skydio drones are thermal equipped. Locate persons of interest faster night or day with far less risk to your officers.

Skydio is a force multiplier for your agency
